**Compact...fits almost anywhere...saves time...saves steps...
puts filing and finding at your fingertips**

A NEW KIND OF FILE The Fidelity Horizontal File is a great new idea in office efficiency. A file that turns all the old ideas about filing upside-down. Better yet, turns them sideways to save up to 50% of your valuable floor space.

Drawers are nearly 30 inches wide, 17 inches deep. Which means the Horizontal File works where other files won't. Beside or behind your desk, as an example. Or in narrow hallways or along crowded walls. Anywhere. And wherever you put them, you file and find twice as fast as with conventional files.

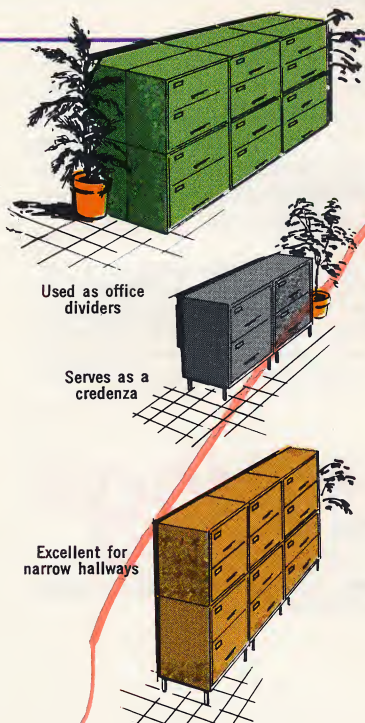

TRY THE FIDELITY HORIZONTAL FILE. Put it to work in your office. Pack it with letters, invoices, folders—all the office paperwork you can find. Then notice how all your records are easily visible, and so readily available. And how the file drawers glide free and easy, no matter how you load them.

CONSTRUCTION? Horizontal File construction is solid, strong, durable. Pull-out handle and label-holder on each drawer front—full suspension cradles. All models equipped with interlocking safety cable to prevent more than one drawer opening at a time. Locks included free. Handsome walnut woodgrained top. Choice of No. 90 Black, No. 50 Gray or No. 75 Beige enamel. F.O.B. New York Factory,
